DETAILED ACTION

All figures are improperly crosshatched. All of the cross hatching patterns should be selected from those shown on page 600-81 of the MPEP based on the material of the part. Also see 35 CFR 184 (h)(3) and MPEP 608.02.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter that the applicant regards as his invention.

Claims 1-4, 7-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 7 contain indefiniteness problems that made it difficult for the examiner to clearly ascertain what exactly the scope of the claim is. See that **claim 1** recites "a contact a three" in the first line. Also, it has become apparent to the examiner that comas are omitted in **claim 1** in many places where they are necessary, making the claim unclear. Also, see that **claim 7** recites "memory device said having...", which has made the claim confusing to the examiner. See that **claim 7** is also missing comas that will make the scope of the claim clearer.

All claims would be allowable if rewritten or amended to overcome the rejections under 35 U.S.C. 112, second paragraph, set forth in this Office action (See attached Interview Summary). See that the claims recite a memory device with a sidewall formed in a step configuration , wherein said first sidewall is opposite said second sidewall... in

combination with specific structural limitations regarding spacing of the sidewalls and position of conductors.
